TABLE OF CONTENTS OF "OPERATING CONDITIONS AND CARBURETION
 IN AUTOMOBILE ENGINES"

I. M. Lenin

The book covers the basic principles of carburetor engines and examines the problems connected with fuel feed and testing. It is intended as a textbook for students in higher technical automobile schools and as a manual for engineers and technical workers specializing in this field.

TABLE OF CONTENTS

	Page
Preface	3
Introduction	4
Part I. THEORETICAL CYCLES OF INTERNAL COMBUSTION ENGINES	
1. General Information	7
2. Classification of Cycles	7
3. Ideal Otto Cycle	9
4. Ideal Diesel Cycle	21
5. Ideal Sabathe Cycle	26

Part II. EFFECTIVE WORKING CYCLE OF AN AUTOMOBILE CARBURATOR ENGINE	
6. Introduction	33
<u>Chapter 1. Injection Process</u>	33
7. General Information	33
8. Temperature in Cylinder at Beginning of Suction	34
9. Temperature in Cylinder During Intake Process	37
10. Intake Pressure	41
11. Gravimetric Feed in Engines	45
12. Structural Parts of Intake Mechanism	52
13. Volumetric Efficiency	55
14. Ratio of Residual Gases	63
<u>Chapter 2. Compression Process</u>	65
15. Compression Process	65
16. Pressure and Temperature at End of Compression	66
<u>Chapter 3. Fuel for Automobile Carburetor Engines</u>	67
17. Main Requirements for Motor Fuels	67
18. Classification of Motor Fuel Hydrocarbons	68
19. Main Characteristics of Petroleum Motor Fuels	74
20. Automobile Gasolines	76
21. Ligroines and Kerosenes	79
22. Equations for Combustion of Fuels with Known Elementary Chemical Composition	79
23. Heating Value of Motor Fuels	87
<u>Chapter 4. Fuel Combustion in Engines</u>	87
24. General Considerations	87
25. Oxidation Processes in Motor Fuels	88
26. Dissociation in Combustion Processes	90
27. Combustion of Fuel Mixtures of Various Compositions	92

28. Limits of Combustibility of Fuel Mixtures	<u>Page</u> 98
29. Combustion During Throttling	100
30. Combustion at Various Temperatures of Cylinder Walls	103
31. Combustion at Various Engine Speeds	105
32. Combustion at Various Degrees of Compression	108
33. Analytical Determination of Temperature and Pressures at the End of Combustion	109
<u>Chapter 5. Knocking</u>	114
34. General Considerations	114
35. Influence of Type of Fuel on Knocking	115
36. Influence of Structural Factors in Engine on Knocking	119
37. Influence of Operating Factors in Engine on Knocking	121
<u>Chapter 6. Expansion and Exhaust of Products of Combustion</u>	123
38. Expansion Processes	123
39. Exhaust Processes	127
<u>Chapter 7. Indicated Power of an Engine</u>	130
40. Indicated Work	130
41. Mean Indicated Pressure	131
42. Indicated Power of Engine	132
43. Fuel Consumption	132
44. Apparent Characteristic of Indicated Power	134
45. Partial Characteristic of Indicated Power	137
<u>Chapter 8. Mechanical Losses and Effective Power of Engine</u>	138
46. Mechanical Losses of Engine	138
47. Effective Power of Engine	143
48. Apparent Characteristic of Effective Power	143
49. Partial Characteristic of Effective Power	145
50. Power Displacement Characteristic of Automobile Engines	146
51. Utilization of Effective Power of Automobile Engines	151
52. Load Characteristic of Effective Power	154

	<u>Page</u>
53. Influence of Structural Factors in Engine on Apparent Characteristic	158
54. Influence of Operational Factors on Apparent Characteristic	162
55. Engines Supplied with Superchargers	165
56. Regulation Characteristics for an Engine	172
<u>Chapter 9. Efficiency and Thermal Balance of Engine</u>	174
57. Efficiency	174
58. Thermal Balance of Engine	177
59. Variations in Heat Utilization in Accordance with Apparent Characteristic of Engine	180
60. Variations in Heat Utilization When Engine is Throttled	184
61. Heat Utilization During Variations in Compression Ratio	186
62. Variations in Heat Utilization in Accordance with Regulation Characteristic	187

Part III. CARBURETION

<u>Chapter 1. Formation of Combustible Mixtures</u>	190
63. General Considerations	190
64. Volatility of Motor Fuels	192
65. Heat Phenomena During Evaporation of Fuels	198
<u>Chapter 2. Characteristics of Single Jet Carburetor</u>	204
66. Flow of Fuel From Jet	204
67. Passage of Air in Carburetor	213
68. Characteristics of Single-Jet Carburetor	218
<u>Chapter 3. Optimum Characteristic for Carburetor</u>	221
69. Optimum Mixture During Engine Throttling	221
70. Optimum Mixture During Constant Rate of Exhaust in Diffuser and at Various Engine Speeds	226
71. Optimum Characteristic for Carburetor	228

<u>Chapter 4. Principal Carburetor Designs</u>	<u>Page</u>
72. General Considerations	231
73. Carburetor With Reduced Diffuser Exhaust (Additional Air)	231
74. Carburetor With Reduced Jet Exhaust (Fuel Economizer)	235
75. Carburetor With Compensation Jet ("Zenith")	239
<u>Chapter 5. Additional Devices for Carburetors</u>	242
76. General Information	242
77. Idling Jets	243
78. Starting Device	246
79. Accelerating Pump	249
80. Economizers	251
<u>Chapter 6. Carburetor Construction</u>	257
81. Construction Formulas	257
82. Carburetor K-14 (M-1 Automobile)	258
83. Carburetor MKZ-6 (ZIS-5 Automobile)	263
84. Carburetor MKZ-10 (ZIS-5 Automobile)	267
85. Carburetor K-23	269
86. Carburetor K-24 ("Moskvich" Automobile)	272
87. Carburetor K-49 (GAZ-51 Automobile)	274
88. Carburetor MKZ-L-3 (ZIS-110 Automobile)	277
89. "Zenith" Carburetor, Model 63-A-W 11-R	282
90. "Zenith" Carburetor, Model 28-A V-11	286
91. Ford Carburetor	290
92. Carter Carburetor, Model ETT-1	294
93. Solex Carburetor, Model 35-RZFAIPO	290
94. Pallas Carburetor	302
<u>Chapter 7. Jet Tube Discharge Measuring Devices</u>	305
95. General Considerations	305
96. Devices for Absolute Measurement of Amount of Flowing Liquid	305
97. Devices for Relative Measurement of Amount of Flowing Liquid	306

Part IV. TESTING AUTOMOBILE ENGINES	
<u>Chapter 8. Testing Automobile Engines</u>	
98. Nature of Tests	309
99. Setting Up Engine	309
100. Connecting Engine With Braking Appliances	309
101. Determining Effective Power of Engine	310
102. Determining RPM	310
103. Determining Fuel Consumption	322
104. Cooling Engine During Testing	325
105. Determining Air Intake for Engine	327
106. Indicators	330
107. Measuring Temperature	336
108. Determining Ignition Moment of Combustible Mixtures	340
	344
Appendix. Examples of Heat Computations for Automobile Carburetor Engines	345
